Attorneys for Plaintiff

UNITED STATES BANKRUPTCY COURT OF CALIFORNIA

CENTRAL DISTRICT OF CALIFORNIA

BAGRAT BALASANYAN, an individual)	Case No.: 2:12-cv-07589-DSF-(DSFx)
)	
Plaintiff)	DECLARATION OF ARSHAK
)	BARTOUMIAN
vs.)	
)	
DEPARTMENT STORES NATIONAL)	
BANK., <i>et al</i>)	
Defendants)	
)	
)	

1. I am the attorney representing the plaintiff and I make this declaration in support of my response to the pending Order to Show Cause by the court's own motion.
2. By virtue of the foregoing, I have personal knowledge of the facts set forth in this Declaration, and if called upon as a witness, could and would testify competently to these facts under oath.
3. My personal family issues had previously kept me from fully doing my responsibilities as I have had three family deaths in the past months, that being of my uncle, my cousin, and then my mom.
4. However, after these occurrences which had taken a toll on me personally, I had my own personal medical issues. I was seen by internal medicine doctor Shanna Hyunshil Choi, M.D., on June 18, 2012 for chest pains. The doctor did an EKG, and

1 other heart related tests, and my chest wall had pain was the outcome. See attached
2 exhibit "A"

3 5. My primary doctor Steven We Kin Lee, M.D. ordered me to see him on August 30,
4 2012 as for concerns over my blood pressure and chest pains. At that time various
5 tests were ordered and blood pressure medication was ordered, along with blood
6 testing as shown via exhibit "B".

7 6. My tests for blood work were collected on September 27, 2012 with results given on
8 September 28, 2012 as shown via exhibit "C". The results were not well for my age
9 and normality. The standard range for micro albumin is less than 20.00, with my
10 results being 648, which is over 30 times the normal limit. This was also true as to
11 for micro albumin / creatine in the blood which should be less than 30, but my results
12 were 225.

13 7. I was told that there was leakage of blood in the urine which was due to damage to
14 my kidneys. If persisted, there may be transfusions, dialysis, and kidney replacement
15 so further testing and ultrasounds were to be done.

16 8. I was instructed to lose weight, exercise, less stress, low sodium and low sugar diet,
17 as an initial step in this medical problem. I was then retested again on November 1,
18 2012, with results given on November 2, 2012. The Micro albumin content had
19 decreased to 485, and the micro albumin / creatinine was 201. Both levels had come
20 down with my losing close to 25 pounds. See attached exhibit "D".

21 9. I was further seen by other doctors in the mean time, Dr. Kassabian, M.D. as a
22 urologist, and finally was referred to Dr. Bijan Nikakhtar M.D. at UCLA Medical
23 Center a specialist in Kidney. Dr. Nikakhtar has been treating me with further
24 testing, such as 24 hour lab testing, oxygen therapy, wherein I have been ordered to
25 do ten sessions in a oxygen tank to replenish my oxygen in the body. I have only
26 done a few tests thus far, as each is once a week and drains me after each session.

27 10. Further new blood works, ultrasounds, X-rays and EKG have been reordered for both
28 my Hearth and Kidnesy. Although promising that the amount has been lowered, the

1 amounts are still significantly high for my age. I have been further ordered to do
2 testing to see if the damage to the kidneys are cancerous. All this is to find out the
3 cause of the damage, so that preventive action can be taken immediately.

4 11. This is a life changing matter as there is damage to my kidneys, which I have always
5 thought was lower back pain, however, the pain is due to the kidneys. Both sides
6 have been in pain and are being looked at to see the true cause.

7 12. Adding more distress and sorrow, on Thanksgiving Day, my grandmother passed
8 away. This year has truly been a loss for words, and with my own health issues, my
9 life has been in shambles.

10
11 I declare under penalty of perjury under the laws of the United State of America that the
12 foregoing is true and correct. Executed this November 24, 2012 Glendale, California.

EXHIBIT “A”

Member name: Arshak Bartoumian
Date of birth: 7/26/1972
Gender: Male
Primary care physician: STEVEN WE KIN LEE MD
Date printed: 11/24/2012

Past visit information

General information

What:

Office Visit with SHANNA HYUNSHIL CHOI MD

When:

Monday June 18, 2012 3:10 PM

Where:

INTERNAL MEDICINE (ERWIN STREET MEDICAL OFFICE U-ERWU)

This visit's diagnosis:

CHEST WALL PAIN
Essential Hypertension

Phone:

888-515-3500

Vitals

Blood Pressure:

110/82

Temperature:

98

Temp source:

Tympanic

Height:

5' 9" (175.3 cm)

Weight:

240 lb (108.863 kg)

Patient instructions

- 1) Take Ibuprofen 600mg 3 times a day with food
- 2) Follow up with PCP if symptoms persist or worsen

Medications prescribed during this visit

Name	Start date	Date stopped
Ibuprofen (MOTRIN) 600 mg Oral Tab	5/18/2012	

EXHIBIT “B”

Member name: Arshak Bartoumian
Date of birth: 7/26/1972
Gender: Male
Primary care physician: STEVEN WE KIN LEE MD

Past visit information

General information

What:

Office Visit with STEVEN WE KIN LEE MD

When:

Thursday August 30, 2012 11:30 AM

Where:

FAMILY PRACTICE (WOODLAND HILLS MEDICAL OFFICE U-NRSU)

This visit's diagnosis:

HYPERLIPIDEMIA (HIGH BLOOD FATS)

Essential Hypertension

PLANTAR FASCIITIS

Phone:

888-515-3500

Vitals

Blood Pressure:

130/72

Pulse:

57

Temperature:

97.4

Temp source:

Tympanic

Height:

5' 9" (173.3 cm)

Weight:

241 lb (109.317 kg)

Patient Instructions

AVS - AFTER VISIT SUMMARY:

Blood pressure is controlled well.

Be better about taking losartan (Cozaar) daily.

Decrease Atenolol to 1/2 tab nightly (12.5mg nightly)

For your heel pain, please remember to wear comfortable and supportive shoes during the day. There are arch supports / insoles called Superfeet available at our Health Education office or at most sporting good stores. Stretch your plantar arch before getting out of bed and before you sleep. You can make a rolling ice massage with a partially filled 0.5 liter plastic water bottle which you can roll under your feet. Tyfenol may also help.

xrays of heel ordered. Can do with labs.

Labs ordered. Fasting instructions: no alcohol for 72 hours and no food for 14 hours prior to tests. Water ok. Please stay hydrated.

Main laboratory is located in the Lower Level of main hospital, entrance 4 - hours are 9am-9pm Mon-Fri. Closed Sat/Sun/Holidays.

Northside lab is located on 1st floor of Northside building, entrance 6 - hours are 7am-5pm Mon-Fri and 7am-1pm Sat. Closed Sun/Holidays.

No appointments necessary for laboratory.

If you do not hear back regarding your results within one week of having them done, please give me a call at 888-515-3500 or email me (register at www.kp.org/register if you have access to a personal computer).
